Reasons for allowance

1. This communication is in response to applicant's 08/29/2005 amendment in the application of Tamura for a "Cell search method in CDMA capable of carrying out a cell search processing at a high speed" filed 09/13/2000. This application claims priority to Japan Application No. 11-260461 filed 9/14/1999. The proposed amendments has been entered and made of record. Claims 1, 4-5, 7, 9, 11 have been canceled per applicant's request, and claims 2-3, 6, 8, 10, 12 have been amended. The claims have been amended to include the allowable subject matter set forth in the office action mailed on 04/30/2004.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. The application has been amended as follows:

IN THE CLAIMS:

I. Cancel the withdrawn claims 13-18.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Claims 2-3, 6, 8, 10, 12 are allowable as evident by applicant's amendment (Claims are renumbered as 1-6 respectively)

6. The following is an examiner's statement of reasons for allowance: The closest prior art of record fails to disclose or suggest the steps measuring by a timer, an elapsed time interval between an end of communication and a start of re-communication;; estimating a moving speed of a mobile station; estimating a moving distance on the basis of the estimated moving speed and the elapsed time interval and determining on the basis of the elapsed time interval, whether or not uses the cell search result information on the previous communication should be used; carrying out a normal cell search processing when the timer value is not less than the communication stop time interval threshold value; wherein carrying out a normal cell search processing when the communication stop time interval is not shorter than the threshold time interval, as specifically recited in the claims. The instant invention, in combination with the other claimed features, improves upon the Prior Art by providing a method and system for a cell search circuit used in a CDMA communications system.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
